QUALITY BY EVERY MEASURE

Henry Broch Foods has been putting the ease in seasonings – meeting the blending, formulating and packaging needs of food processors, packers and purveyors – for over 75 years. We’re a private-label partner, a co-packing champion, a skilled custom blender and formulator, and a developer of innovative packaging ideas. We can process and package ingredients in any quantity: from pre-measured spices for meal kits, to seasonings by the ton. We also have the capacity, equipment and expertise to help you with urgent short run needs.

Our mission, simply put, is to support our customers, helping them capitalize on opportunities, industry trends and disruptions with flexible, cost-managed solutions.

and essential
nutrients.

Vegetables: High Quality. Huge Selection!

All of our powders are made from the highest quality raw ingredients available, combined with our specialized drying process it ensures that all of the essential nutrients are retained.

Vegetables are fascinating products of nature that constantly give us surprises and new ways how to use them in enrichment of our lives, science and medicine. History of vegetables reaches the most distant years of human existence, when hunter-gatherers exited the Africa and started spreading across entire planet earth. As the birth of modern human civilizations, vegetables were identified as the sourced of great medicinal and nutritional power.

Dehydrated Vegetables

As colorful as they are flavorful, our vegetables are dried to lock in superior nutrition, purity and texture.

GO Strong!

Garlic & Onion, Grown & Ground

Dehydrated Onions & Garlic

Non-GMO grown garlic and onion and with full traceability, perfect ingredients for high quality food products. Garlic and onions are grown at our Illinois-based facility and are then washed, dehydrated, and processed, preserving field-fresh flavor for your food product.

The power duos are known as the oldest food flavoring and seasonings, and infused into the culinary tradition of many civilizations across the world. This is mainly because they were less perishable than other foods of the time, and were easy to grow and transport. By offering unique nutritional value and wide array of medicinal benefits, the plants were quickly identified as one of the most precious gifts of our nature, which was expanded with selective breeding into wide array of popular types that are currently used all over the world.

Paprika

Rosemary
Tamarind
Turmeric
White Pepper

Our extraction process begins with 600,000 SHU Chilies!

Our process creates paprika oleoresins, capsicum oleoresins, powders and crystals with a higher absorption rate than conventional products on the market today, allowing us to be a low cost supplier of a high quality product.

PAPRIKA OLEORESINS

Henry Broch Foods offers paprika oleoresin obtained from variety of Capsicum Annum L, from which paprika powder is produced, allowing us to offer sweeter flavor notes, higher color values with very low heat pungency. In the food industry practice has shown that 1 kg of paprika oleoresin replaces 12-15 kg of paprika powder with respect to color intensity. Our paprika oleoresin is offered in both oil and water-soluble forms with color value ranging from 3,000cu up to 200,000cu.

CAPSICUM OLEORESINS

The capsicum oleoresins are offered in both oil and water soluble forms with SHU availability ranging from 15,000 to 9,000,000, and from 500 Color Units and up.

CAPSAICIN POWDERS

The capsaicin powders are water soluble, with a range of 150,000 to 2,250,000 SHU.

CAPSAICIN CRYSTALS

The capsaicin crystals come in a range of 90%, 95% or 99% pure capsaicinoids up to 16,000,000 SHU.

The new capsicum and paprika oleoresins products are available in pails, drums, crates or batch packed to fit specific applications. Capsicum powder and crystals are packed in 10g, 100g or 1kg bags.

Paprika

Available in cases, co-packed, or blended to fit certain applications.

SMOKED

Paprika does not come from a nut or a leaf. It comes from a variety of dried and ground peppers. Just like peppers, paprika comes in a spectrum of heat levels, from mild to hot, hot, hot.

Paprika Powder is a spice made from air dried sweet chili pepper, and is also used to add color and flavor to many types of dishes.

Packaging	55 lbs

We'll help you bring the right kind of zing to sauces, seasonings, spice blends, soups, dressings, prepared foods and more.

Clean. Lean. Green. PROTEIN

Meet the growing consumer demand for nutritional powerhouse foods.

NUTRAPOWER Organic Protein Powders can be used as protein dietary supplements, or you can substitute for up to 15 percent of the flour in most applications.

Ideal usages for NUTRAPOWER Organic Protein Powders include:

- Shake and smoothie mixes
- Grain-based snack foods
- Breads
- Pancake, waffle and muffin mixes
- Anything that needs a CLEAN protein boost!

Organic Protein Powders

Excellent Solubility, Absorption and Source of Amino Acids

PEA PROTEIN POWDER

- Available in both 80% and 85% protein content levels
- Easily digestible and high in protein
- Good source of vitamins A and D
- Excellent source of amino acids – essential for building lean muscle

MUNG BEAN PROTEIN POWDER

- Contains 80% protein content
- High satiety, with resistant starch and dietary fiber
- Provides nutrients including: manganese, potassium, magnesium, folate, copper, zinc and B vitamins

LENTIL BEAN PROTEIN POWDER

- Contains a minimum of 80% protein content
- Excellent source of molybdenum and folate
- Good source of dietary fiber, copper, phosphorus and manganese, iron, vitamin B1, pantothenic acid, zinc, potassium and vitamin B6

Studies suggest that the essential vitamins and minerals in pea proteins can help to reduce inflammation, decrease blood pressure and aid digestion.
